Miss Maud Wilson left on Monday for Winnipeg, and after spending a few days with friends in the city will join her father at Battleford. Miss Wilson will be greatly missed by her many friends in Elm Creek, and her place in the Methodist Church, where she

was organist for a considerable time, will not be easily filled.

"The Art of Drinking," by Robert Bell, M.D., etc., is the title of an article in a contemporary, the gentle art being expounded with admirable clearness by the learned doctor, and containing much sensible advice. Unfortunately, some men do not require much instruction in "The Art of Drinking." Indeed, in many cases it amounts to a gift.

Thomas Kennedy, the postmas ter of Elm Creek, visited Rathwell on the 14th. He states that Elm Creek is growing steadily, and that the country around that burg is being settled rapidly with a good class of settlers. The for-CHAS. ANGLE mation of the new Municipality of Grey and the establishment of bank were material factors in

Mr. H. E. Jenner, of Carman **Special Offer** who has had such a large class of pianoforte pupils during the past nine months, has gone to Morden to visit his sister for a few days. He will return to Carman on July J. Miller, manager of the Bank 16th to meet Mr. T. D. Tripp, the examiner from the Toronto Conoff at Carman to examine the pupils prepared by Mr. Jenner.

SPRINGFIELD—The coming Suburban Winnipeg, and OPPOSITE THE SHOPS SITE

AX IN TREASON TRIALS.

herp Edge Turned Toward Price te le Pre Every one is a wate of the dreadfully simificant part the esecutioner's as plays in a trial for high treason. The sharp symbol of death is carried before the prisoner, with its blunt side turned toward him so long as he has not been sentenced, says Macmillan's Magazine, and just before sentence is pronounced the sharp edge is turned his way.

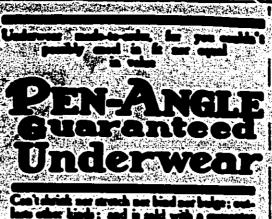

cination for the unhappy and probably innocent man. In those days, now happily gone by, no one seems to have reflected on the unnecessary cruelty of harrowing the feelings of men about to die by such shocking judicial byplay. Not every prisoner treated this purely symbolic but otherwise superfluous and unpleasant ceremony as contemptuously as did Lord Balmerino. When the three coaches couveyed the Lords Kilmarnock, Balmerino and Cromartie from the Tower to be sentenced at Westminster on July 28, 1746, a difficulty arose. It was not laid down by prescription or use in which coach, if there were more than one, the fatal ax had to be carried. "Oh, put the ---thing in here." cried brave old Balmerino. "I don't care."

Yet, notwithstanding his contempt for this borrid symbol, the undaunted old man cheerfully suffered death for his attachment to another symbol, the white cockade. But Lord Kilmarnock. in the next coach, was dreadfully frightened, as he showed himself to be. mitted the doctor to measure his by his thorough realization of what chest and legs and to pound his back. I the awful as would mean to him. He "Hop over this bar," ordered the inquired minutely into all the details of an execution, wanted the governor of the Tower to tell him whether his head would roll or rebound, and when on the scaffold he saw the executioner dressed in white, with a white apron. the floor. He was indignant but he whispered to his chaplain, "Home. bow borrible!" \$ **\$** _

AUSTRALIA AND EMPIRE.

Some Criticisms On Antipodean Se ciety and Influences. Mr. J. Ramsay Macdonald, M.P.

whip of the British Labor party, writ-ing from Australia to The London Chronicle, says:

Here one discovers a serious weakness in Australian labor experiments. There is practically no economic teaching and no economic literature in Australia. What has been written about her industrial legislation is either indiscriminating panegyrics or equally indiscriminating jeremiads. She is prosperous, her workers have shared in her prosperity; she has al-most succeeded in weeding from her garden the ugly and tainted plants of sweating. Why? Naturally she thinks it has been owing to the industrial legislation and the protection with which she has been experimenting. These have had their due effects. but their influence has by no means been, on one side, and other potent influences have alse been at work. I could discover no attempt that had been made to analyze these causes and assign to each its proper place. In Australia classes and masses are growing up. The classes copy London... The capital of their thoughts is on the Thames. Their sentiments are most easily tapped by the stranger from home because they are the hosts, and belong to the same class as those whose business or pleasure takes them to Australia.

Then there is a genuine Imperialist section prepared to take part in the responsibilities and the privileges of Empire. It is small numerically, but it is wealthy, it is in politics, and it feels the magic sentiment of the Home founder of the Smithsonian institution Land. Neither of these sections represents Young Australia Finally, there is the great mass of the common people, typified by the readers of The Bulletin, who regard the Mother Country as a kind of moner-lender, or as a snob. or as a stepmother, or who are growing indifferent to her existence, and yet who, when they think of it, retain a good deal of affection for us. This is th Radical Australian Nationalist section-Young Australia. It clamors for an Australian policy; it buys Australian goods only; it is against borrowing in London; it wants to work up its own raw material; it despises the classes: when it wants to be severe upon you it reports you with a draw!...it never goes to Government ago) thrown forward as scouts, which | Houses; it belongs to the Labor party and to trade unions, and meets in trades hall. It is to wield the greatest

THE FIRST SYNDICATE

Hew the French Word Was Americ Land Amid Much Jesting.

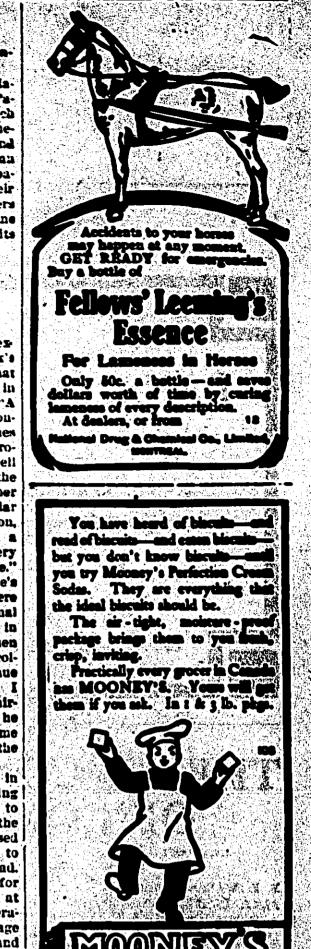

Throughout the European negotiations in reference to the Northern Pac.fc railroad au interesting French word recurred again and again-namely, "syndicat"-which Jay Cooke and lis partuers soon converted into an English word, syndicate. The newspaper reporters rolled it under their longues. It was a find for punsters and versifiers. The New York Tribune received these lines from one of its waggish contributors:

Pray what is a syndicate Intended to indicate? Is questioned abroad and at home.

Say, is it a corner Where Jay Cook-e Horner Can pull out a very big plum?

in congress the word was under er amination. Some of "Sunset" Cox's constituents had written him, that member declared, to ask if it were in any way related to the Kuklux. "A scholar learned in philology," he continued amid laughter. "says it comes from the original Chinese and is pronounced 'Ah Sindecat.' from a well known player of cards called the beathen Chinee.' A revenue reformer writes me that it is an animal peculiar to Pennsylvania, with a head of iron, eyes of nickel, legs of copper and a heart of stone. It consumes every green thing outside its own state." Cox went to Sir John Mandeville's "Travels In Far Cathay" and there found an account of a "strange animal of the lizard kind. He was known in anciente books as a chameleon. When the sun did shine, he took various colors. Sometimes it wore a golden hue and sometimes had a green back. I caught him by means of a steele mirror, which so bedazzled his eye that he was easily caught. I bring him home as a strange beast. It is called by the natives a scindicat."

The syndicate's task was to take in the old 6 per cent bonds issued during the war, many of which had drifted to l Europe, where they were held by the thrifty peasantry, who had purchased them at paper money prices, and to sell the 5 per cent bonds in their stead. It was a complicated work, calling for complete control of the markets at home and abroad. Though the operation had to' run the gantlet of savage attacks by opposition politicians and editors, it was instantly successful. Indeed, two syndicates were formed, one in London through the new house of Jay Cooke, McCulloch & Co. and the other by Jay Cooke's firms in America. The banker was warmly congratulated on the successful management of the syndicate by President Grant and his

KEEP BABY WELL

Ask any mother who has used Baby's Own Tablets and she will tell you there is no other medicine so good. We pledge you our word there is no other medicine so safewe give you the guarantee of a government analyst that Baby's Own Tablets contain no opiate or poisonous soothing stuff. The Tablets speedily relieve and cure all the minor ailments of babies and young children. Mrs. L. F. Kerr, Green. bush, Ont., says: "Baby's Own Tablets are the best all round medicine for babies and children 1 know cf. I can strongly recommend them to mothers from my own experience. Sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Her hat obscured his view at the theatre, and in a kindly voice he be possible for her to remove it. A stiffening of the head was his turned on him. "There is no demand for my do

ing so," she said. No demand?" he echoed.

Then he rolled his overcoat and placed it on his seat, sat on it, and getting his hat from under the seat. placed it on his head.

In a moment there was a cry of 'Take it off." "Take that hat off." And with a swift movement the lady unfastened her hatpins and removed her hat. So did the man .-Ladies' Home Journal.

Among our neighbors is a family of bright, interesting, but exceedingly lively youngsters, and, as is always the case in such families, the mother has frequent cause to reprimand them. On such occasions she often points out the good behavior of a certain little playmate as a good example. One day, when correcting them for some mischief, she "Now, Margaret would not said : do a thing like that, would she?" "No, of course she wouldn't." said Jack, a bright little tot of four, cause Margaret is a good little girl. She's bout the best little girl know: but why wouldn't she be? Her father's a doctor, and o' course he'd keep the best one for himself." Chicago Tribune.

According to government statistics one person was killed in every fortyeight hours by accidents in the streets of Chicago during the last twelve months. •

lates how the horse of Alexander the Great, Bucephalus, would at night on hearing a blast of the trumpet from the soldlers on guard, showing the approach of the enemy, run at great speed to bis master's tent and with his teeth grab the sleeping monarch and shake him until he sprang into the saddle and galloped toward the enemy. Also that the great Callph Harounal-Raschid in the eighth century in marching toward the forces of Queen Irene of Constantinople always had a number of trained Arablan horses (direct descendants of the famous horses owned by Ishmael 4.000 years from time to time returned to camp and by a peculiar whinny and neigh reported the proximity of the enemy. Again, he relates the experiences of the Portuguese explorer, Albuquerque, who lived for many years in the sixteenth century on the island of St. Helena, where he and the natives taught the herds of wild horses there not only to dig potatees, but to husk corn. and these horses descended from a herd taken there from Cappadocia in the second century, as related by the Greek historian, Philistorgius. But, to come down to the present day, it is related by a retired New England elergyman whose sands of life had nearly run out that one day on leading his horse down through a lane to a brook for a drink the animal suddenly halted and, turning its head around, grabbed up with its teeth one of its hind shoes which had just dropped off, and, holding it in its mouth with the nails dangling, it backed up against a stone wall and clapped it on

The Owner and the Visitor.

His house, the first he had ever owned, being nearly finished, the Flatbush man went forth one fine afternoon to inspect it. As he entered the front door he observed a well dressed man standing within, apparently admiring the beauties of construction and decoration. In an instant the pride of the owner swelled within him. Here, was where he would make the visitor. verdant with envy and, incidentally, intercept a few bouquets for himself. Stepping up to the stranger, he remarked:

"It's a beautiful house, isn't it? It's worth every cent of the investment and a great deal more."

"You are right." replied the stranger. "Yon are, I suppose"-

"Yes. I'm the owner," interrupted the other, "and just let me tell you" that there are not many men round here who own as fine a house as this." "I quite believe you," serenely answered the visitor. "I'm the man, you see, who holds the first mortgage on

The Wily Partridge.

Every creature has a wonderful faculty for determining at what distance a man or anything else is able to strike, its capacities in this direction being far more marked than many care to acknowledge. For instance, as firearms have been improved the keener has become the watchfulness of partridges. They have not been slow to recognize the advantages which the modern' chokebore affords the modern gunner.-London Mgil.

This all believers might do very quickly, but as a rule many are slow to enter in. and some never do. Read I Cor. z. 6. 11, and context and Heb. ill, 12, to iv, 11, and give beed to the Spirit's testimony concerning largei's misconduct and to His warnings to us not to fall into the same sins. In poetry Cansan is often taken to represent heaven and Jordan death, but this is not the teaching of Scripture, as there are no foes to overcome nor fighting to be done in heavdemption by the blood of the Lamb: the overthrow of Pharnoh's hosts in the Red sea suggests our complete separation from the world, the world crucified to us and we to it (Gal. vi, 14). while Jordan, with its memorial heap. in the bed of the river and another on the Cansan side, speaks of death to self, crucified, buried and risen with He knew there was some unusual Christ (Gal. 11, 20; Bom. vl. 6-11; Col. iii, 1-4).

Last week's lesson was all victory and praise, but the first unpleasant thing, the waters of Marah, set them all murmuring. How like them we are. See how by a tree the waters are made sweet, and consider how the certainly would affect telephone sertree also (II Kings vi, 6). The kist restored and the bitter made pleasant by a tree-what can it mean but Him elf. the tree of life of Eden and Revelution, the green tree of Luke sxill, 31? Obedience to Him brings health t body and soul and gives us Elim instead of Marab (Ex. xv. 23-27).

How short lived was their peace: Just a few days farther on their jourour Lord have this in mind when He sent 93,000,000 miles by wireless." shall drink (Matt. vi, 25). "Seek not se what se shall est or what ye shall drink. Live not in careful suspense. have need of these things" (Luke xil. 29, 39, margin), No doubt, for it was He who said to Moses, "I will rain bread from beaven for you" (verse 4) who afterward suid of Himself. "I am the Living Bread which came down from henven, (Jola TL 51). He gave them fiesh also, for in the evening the qualis came up and cov ered the .: amp. and in the morning when the dew was gone the ground was covered with mauna, which they gathered, some more, some less, every man according to his eating (verse 12-18: This brend from beaven with shipping men and the longthoremen which He fed them, so suggestive of Himself, the True Bread, bad to be gathered every day, the portion of a day in His day (verse 4. margin). In the commission may reach an equa connection with this last phrase see II Kings xxv. 30; Jer. Ill. 84: margin. and be mire that the same Lord is appointing your portion of all things needful every day, and He would have you without fall gather your portion from His Word every day. for "man doth not live by bread alone, but by every word that proceedeth out of the month of the Lord doth man live" (Deut, vill, S; Matt. iv, 4). He would have us eat His Word with reloicing and esteem it more than our daily food (Jer. 17, 16; Job 1111,-12). We must also accept all the events of life as His hest portion for us and never murmur, for all our murmurings are not against people or circumstances, but against God Elimself. and He'bears every murmur (verses 8-12). Having food and raiment, let us be therewith content. Be content with form rates for the conveyance of such things as ye have. for He hath parcels. said. "I will never leave thee Dor forsake thee" (I Tim. vi. 8; Hell, sill 5). The manna was to be gathered fresh every day and not kept over, yet herein some disobered (verse, 20).- They were to keep holy the Sabbath day and on the sixth day gather enough for two days, being assured that that would keep, yet berein some transgreened also and went out to mather it on the seventh day, but found none (verses 27-30). A golden pot was to be filled and kept for future generations | The old crown of the Persian dynasto see bow God provided for their faery effort is being made to expedite thers. This pot of manna, with Aaron's | egg. 'A belt studded with diamonds rod that budded, was at one time kept in the ark (which Mones afterward made), with the tables containing the Ten Commandments (Heh. ix. 4). It is not for us to question the commands of God, but meekly receive His Word. bold it fast and cheerfully obey it. He who redeemed us will certainly care scabbard is valued at £259,000. A for us (Rom. vill. 32), and it is our part joyfully to trust Him. Hidden manna is one of the things promised to the overcomer (Rev. il, 17). May we some day know the full sigaificance of it! We may if we will. The manna tasted like honey (verse \$1). David may have had this in mind when he wrote following question:

Seventy-Five Butineers Shet St. Petersburg-Details of the mutiny of sappers at Kiev show that it was only suppressed after a bloddy engagement between the mutineers and local troops. About seventy men were killed or wounded. Kiev is one of the cities where revolutionary ideas have made the greatest inroads upon the army, and the revolutionary military organization is most powerful, counting among its members dozens of officers. The inutiny was planned to coincide with a political strike as a reply to the dissolution of parliament, involving the railroads, telegraphs and mails. In several of the southern provinces arrangements for the strike had been making for months under the leadership of an experienced organizer, M. Loskotj, who was a member of the first parliament. The decision of the revolutionary staff here to refrain from demontsrations was disobeyed his redemption till be enters into the by the hot-headed sappers. Five hundred men at a given signal left their beds, disarmed the sentries, nurriedly dressed, obtained possession of their rifles and broke into an

armory, secured a number of loaded cartridges, and then marched to the camp square and fired a volley in self at the first volley.

Long Distance Message

Pittsburg .- J. A. Brasher, a noted astronomer said today, speaking of the present disturbance in the sun: Sir William Preece, the great English electrician, recently told me that he believed he had heard more than one solar storm in the telephone. magnetic disturbance causing trouble when he was testing some telephones in his laboratory. Why not? We all know, what difficulty we have in sending or securing messages when there is much induction in the same and in the case of a magnetic storm induced by solar disturbances such vice. During the disturbance fol-lowing the last great spot I received letters from all over the country from electricians and cable operators giving accounts of difficulties in transmitting messages. | One cable operator wrote me that instruments were greatly disturbed on both sides of the Atlantic. With all this evi dence it is quite within the range of possibility, nay, probability, that Sir Investigating The Bell Ottowa, Ont .--- The reilway commis sion has not yet decided whether it will 70 to Winnineg or not. but if this is found necessary, the telephone enquiry will be added to a loc of other msines that will take Chairman Killam and his colleagues to the wheat canital during the second week in Jul The do bt, as to the necessity for further meetings at Winnibeg is caused by the fact that Mr. Shepley, during the sessions in Montreal. endeavored to introduce the evidence taken by the Manitoba Select committee on telephones, which secured a great dea! through Manitoba and variovs; wesnendent componies are operating? The introduction of this evidence way ucressfully opposed by the Bell Co. collicitors, so that if it be found-that the evidence is needed in order that ble decision, the evidence will have to be taken at Winnipeg." Ship for South Polar Expedition London-The Newfoundland sealer Nimrod has arrived and is being refitted for Shackleton's South Polar expedition. She will be re-christened Endurance.

CARADA AND AUSTRALIA Shipping Experts Discuss Question

of Trade Relations.

The remarks of Sir Wilfrid Laur ser, as the Intercolonial Conference, touching the desirability of the establishment of closer trade relations between the Dominion and Australia. have awakened great interest in local shipping circles.

Mr. Thomas Bobb, manager of the Shipping Federation, discussing the matter, said that he believed a greatly increased trade might be done between the two countries, and this the more especially as the trade by the San Francisco route, which was at one time considerable, might now be deemed to be a thing of the past. "We could send lumber to Australin, while the latter could send us in exchange horses, wool, mutton and

butter. "Butter to Canada. Why, is that not like sending coals to Newcastle?" butter to this country two years ago,

just the same," said Mr. Robb. There is another thing in favor of greater - closer relationship between Australia and the Dominion, and that the air. The officer on duty, Captain is the 54 head tax, which the United over the closing prices of a week ago. Akuloff, ran out and addressed the States have now clapped on all per-mutineers and persuaded them to distant entering the United States—that prices today are %c to %c higher perse. He then called out another sons entering the United States-that battalion, drew the men up and led is to say, all aliens; as they are calla charge on the mutineers, ordering ed, except Canadians and Mexicans. them to surrender. Upon their re- The tax hitherto was two dollars. fusal to do so, Capt. Akuloff ordered Now it is four. Of course, the steamthe troops to fire, and fell dead him ship people are supposed to pay it. but you know the irritating and humiliating questions which are asked at the United States border or the port of the country. "Were you ever in jail?" is one of them. Many, desiring to go to England by way of the Pacific, would naturally prefer to land in Canada, where they would be welcomed. The passenger travel be-tween England and Australia has greatly increased of latter years, and there is an increasing desire to reach England by the Australian-Canadian route. Of course, the ocean voyage is a little longer, but then it is cooler. and the passengers land on British territory, instead of having to pass across the United States, and meet with the experiences I have mentioned."

Mr. Robb said that since the C.P.R had opened up the Pacific trade, and that China and Japan had been brought to the door, so to say, that made possible a closer connection between the British people and the East. It had been sometimes said that the British Government had done nothing for Canada, but in this mat-ply on June 1 was 190,351,000 bushter of the Pacific mails alone the els, compared with 151,119,000 bush-Imperial Government had given to els on June 1, 1906, an increase of the C.P.R.; in 17 years; £1.000,000 39,232,000 bushels this year over last, Wiliiam Preece could hear a solar sterling, or at the rate of £45,000 per and the increase over June 1, 1905, sum for carrying the mails. At any w rate, this Pacific trade was bound to are hot blinded by the craze of grow enormously, and the empire at large might and would benefit by it.

WEEKLY REPORT OF THE WHEAT MARKET

Thompson, Sons & Co.'s Report of Local and World's Markets June 20th, 1907.

Wheat-On the date of our last weekly review, the 13th inst., we stated that the wheat markets made an advance for the day of 1c to 1%c. and it seemed as if the severe and heavy decline that had been forced in the previous few days had struck the bottom, and that some fair recovery in prices could be expected. Hope in this respect was short-lived. for on the next day, Friday, the 14th, there was further raiding by the bears in the American speculative markets, which again carried the prices down 1%c to 2c per bushel. "Well; we had to import Australian | On Saturday, however, there was slight improvement again, and since then the markets have continued to improve gradually and moderately, so that today closing prices on the U. S. markets show fractional advances than a week ago on cash wheat and nearby months deliveries, but on October wheat there is an advance of 1%c. We are of opinion that the course of the markets has been more clearly influenced during the past week by the weather and crop situation than by speculative operations and manipulation, and we would fain hope that the future of prices may be governed more by legitimate influences than by the blind sway of frenzied speculation. The general situation has not undergone any particular change during the week. in regard to supplies, world's shipments have been keeping up larger than an pected, probably because of the advance in prices during May persuading holders to let go of more than they otherwise would. This let week, however, there was reported the liberal decrease on ocean passage: of 3,740,000 bushels, and the quantity on passage should continue to decrease from now on. A heavy movement of old crop wheat continues from country points in the U. S. and Canada to terminal centres of accumulation, and the American visible supply stands at 48,010,000 bushels, compared with 28,164,000 bushels last year, and 16,782,000 bush-

A Good Appointment

The aunouncement that Dr S: W. McInnis has been taken into the Cabinet as Provincial Secretary and Minister of Education, will be received with satisfaction throughout the Province. Dr. McIanis is a man of marked ability, and possessed of a keen interest in public affairs J municipal matters, and, later, in the wider field of provincial poli tics, as member for Brandon, he won a reputation for energetic initiative. He is progressive in his ideas, and untiring in the pro motion of what he deems to be in the public interest.

Manitoba has had reason to recognise the public service o Dr. McInnis on many occasions, and more recently in his endeavor to provide for the care of con sumptives. In this, as in other questions, he has shown an enthu siastic interest in the public wel fare: - His appointment to an im don, but it has a broader signifi-

N.D., and an especially designed spraying machine, imported from Germany, has been shipped to Crookston. Experiments will be conducted at Tenney, Georgetown Ada, Crookston; Warren and Kennedy. It is proposed, as soon as the mustard is sufficiently advanced, to spray a large field, load the material and equipment on the first train and ship to the next, point, and so on until all fields are sprayed. These fields will be care. fully watched and visited by experts several times during the summer and the conclusions based on the observations distributed among the farmers of the state.

Potato Bug Pest

The potato bug pest threatens to be very serious this year. The bugs have put in their appearance in larger numbers than ever before and already some gardeners have. had to apply Paris green to their! potatoes to stay their ravages. It was at one time thought that these insects could not survive the winters here and consequently, the portant post in the Cabinet is a country would be immune from compliment to the city of Bran the pest, but it is evidently here to and will have to be faced

In districts where drainage is required, HA the Government of Manitoba have already and are now inaugurating very, extensive drainage systems, whereby lands that are low or flat are reclaimed and made fit for cultivation. When once this land is reclaimed it is especially rich and productive. When not entirely drained it yields an abundance of wild hay of the best quality, and is, consequently, invaluable for stock raising purposes.

Up-to-date maps of the Province are kept on hand, upon which are marked in red all lands for sale. This will be sent free, with price and full particulars, upon application.

For all information and business to be transacted

C. F. Boardman's

I LERLE STETAST.

When Mins Irese Jackson left Coination. O., to pay a visit to ber sunt of Mastings. N. Y., her mother gave ber miny waralage file was to look out for collisions. She was to beware may waraines. The was to look of eperf switches. The was to hold bo converse with either young or old men. She was to have on to her purse. The was to regard any woman whe might address ber as an advestures. All but one of these instructions were enrefally followed by the dinstrea year-old girl. She was somewhat surprised and a good deal delighted to and herself in New York city at last. and the bravely followed the crowd on to the ferryboat and landed at the foot of Thirty-fourth street. There she took a cab for the Grand Central depot. It was only when the got out that she friend her purve was missing. She remembered that some one had crowded ber as she got off the ferry best. but that bit of news didn't affect the backmen at all He was a married man with a family of seven, and he had to amiet in supporting five different saloons, so be wanted cash on the nall. There were tears, but they didn't move him. He had often seen them at home when he had reeled in on Baturday hight without a cent in his pocket.

Mine Jackson couldn't pay the cabman, and me couldn't buy a ticket to Hestings, and for ten minutes she felt rs beigiens as a child. She was about to give the cabman a diamond ring as security when a young man of twentyfive stepped into the breach. He had the long bair that some professional men affect, and be had the rusty tothes that other professions, men affort: bot, as for bis heart, that apparward paid the cabman and told him to be gone. The cabinan smiled and winked and drove away. Then the young man introduced himself as Proor Nordenfeit of Columbia college. femor of languages. He asked the DE inentimable privilege of buying a ticket to Hastings for the young lady. He ashed it because some one had rescued Me sister (from just such a position is

Chicago a few days before. As soon as the young man ancod that he was a professor Miss Jackapa drew a long breath of relief She had met but few professors in her Me but she knew them to be all right

The cally stip be unde and that was not noticed until afterwas in supervise to his travels. Per a Calumbia cellene profes paged in teaching in an for six rs a day, he had gove around the suntry at linkthing mod. He had aces that do pot fall in the way of the ordinary profunner. He knew Detective Johnson and Captain Flynt and the police commissioner, and because of his knowing them be had a surprise on hand.

There was something dramatic in the way Jimmie Sebed up Miss Jackson's last purse and restored it to her. It created a sensation. Assisted by the detective, the captain and the commissloper, be had run down the desperate criminal and forced him to disgorge. The lost money was there to a cent. No. thanks! It was only his way-only an incident in his study of languages. He was about ready to take his leave, but had been urged to call at his convenience in future, when' young Tom Biynn, who was in a city real estate office, but living in Hastings, and an acquaintance of the sunt, called on a matter of business.

He had barely been introduced to Professor Nordenfelt of Columbia college. professor of languages." when the ladies noticed that. Tom stared and the professor changed color. It seemed plain that both had met before. Tom's stare became a scowi. With a gesture. oddly appealing, the other man stopped him and said to the ladies:

"I have waited until the last moment to tell you that this may be my last call here. The university has decided to send me to the island of Samalong to study the very peculiar language of its people, and I expect to be gone a year or more. Miss Jackson, if I have been of the slightest service to you I am estremely pleased. Mrs. Harper, you have made my calls very pleasant and agreeable, and I thank

you." As he bowed his way out he was followed by Tom Blynn, whose face wore & very determined look. Jimmie slip ped his arm through the other's, and when they were hidden by the shrub bery he squared off and said: "Well, I am caught with the goods

"Yes. you got my watch a month ago on a Twenty-third street car. I had my bands on you, but you got the most up to date of the season's eway."

DD."

greatly inconvenienced." "What are you doing here at Mrs. mode.

POTPOURRI OF BODES Plaid Sills For Up -The Foulard One of the noreity suitings the nesers this largely by Freech dret to called drap cress. It is a emitransparent fabrie, with a granite the surface that comes is all the hading shades, and is very popular in gray and all the neutral shades. Bright plaid silks are considered smart for linings of all semitransparest goods and under black greandine are most effective.

The foulard ranks with the ponget as an extremely fashionable and ther-

oughly serviceable dress fabric. and since it is comparatively intexpensive. many women are using it this seamon to develop frocks that are dressy, but still of simple design.

For a servicenble traveling or street gown the striped suitings are unequaled. They come in a variety of colors and are easily fashioned into the smartest of the season's tailored frucks.

For a young girl the overblouse is styles. A graceful amount of fullness "Here is the ticker. It cost me \$3 to is provided by tucks at the shoulder: have it cleaned and put in good run- and the shaped trimming haud that ning order. I hope you have not heen outlines the neck and large armboles adds greatly to the beauty of the

en age for worder Many Breaders Usine It As a

I know silage is a good feed for horses, for I have tried it. I have not, however, led to any great extent because I did not have as much silage as I wanted for both cows and bors I thought more of my cows then did of my borses, so the cows had all they needed and the horses had to go short One winter we had a brood mare

that was fed silage all winter, probably twenty pounds a day. She had some hay and straw to go with it and no grain except what was in the silage, and she came out fat and with a glossy coat in the spring and had a fine, healthy colt. Horses like silage as well as cattle do after they are adcustomed to it.

Fed Silare Exclusively.

A man in Michigan a lew years ago wintered 200 horses on silage and straw exclusively, with no grain. They came through in fine shape, and the brood mares all had fine, strong colts. The Ohio experiment station tried feeding horses on silage through the winter and reported that they came through until spring in the best of condition.

W. C, Bradley of Wisconsin says that one year during spring work he was out of hay, and the only coarse fodder his horses had during all that; period of hard work was silage. He says that the horses never stood work better .-- C. E. McKerrow in Spirit of the West

The General Purpose Horse. I get the best results from horses weighing 1,200 to 1,300 pounds. These horses are used for general purposes. They must have good action, be compactly built, something on the old Morgan type, but a little larger. Such horses are large enough to haul a reasonable load on our roads and can do a good day's work on the average farm. They are useful on the road

SUNGLE RARXEDS STALLION. ADMIXISTRATOR

First prise, London Hackney Show, 1907. for light work. The most useful horses for my general work are good, snappy creatures.

I have but little trovble in breaking our colts, as we treat them kindandling them considerably while

In sewing on buttons put a pin scruts the top and allow the thread to pass over it each time, after which remove the pin, pull the button toward you and wind the thread under it a few times, then end the thread. with a piece of Sannel dipped in turpentine.

If cooked meet is ready for the table before it is required, place in 'a dish and set over a pan of boiling water placed on the back of the range and cover with a cloth. The steam will keep the ment hot without drying it or drawing the julces out.

A white kitchen floor is obtained only by the use of cold water and soap. Hot water, and washing powders tends to yellow the boards.

Rubber cornet laces used in place of tape, or elastic in bor's blouses are much cheaper and stronger than the common elastic.

Rub stain on bands made from vegetables with tomato. If out of season. use a little canned tomato. This is better than lemon.

The tender leaves and small ends of celery should never be thrown away. fevoring soups.

In making a meringue for pie if powdered sugar is used in place of granuinted the meringue will not be watery.

ON HOME NURSING.

Cleantiness and Pure Air of Prime Impertance to Invalida.

The first rule in pursing, the first es sontial to the patient, without which all else you do is as nothing, is to keep the air be breathes as pure as the erternal air without chilling him.

Always have the window of your patient's room open, but not a window on a passage just outside.

The best bedding is an iron bedstead. a hair mattress, no curtains or valance, very light blankets for a covering, as woak patients are always distransed by weight of bedciothes.

Cleanliness of the skin in almost all dissides is of the utmost importance. Care should be taken in sponging of washing not to expose too great's surface at once so as to check perspire tion. Never allow a patient to be walked out of eleep either intentionally, or ac, cidentally, as this does serious harm. Do not whisper or walk on tiptoe, as this is peculiarly painful to the sick. Remember never to leas against, sit upon, shake or even touch the bed up on which your patient lies. This is always an annoyance. Do not talk to your patient while be is taking his meal.

AN ODD TRICK

----Yes 5m ab the Shek

we a little experiment with which THE MAY SMUR and surprise your (riseds, provided you can convince yver mamma that you have no destru to unach her glassware and that the trick you are shout to perform will not injure is the least the soblets you which her to head you. The second Place two chairs facing each other,

with a giam gobiet on the edge of each

NOW THE STACE IS LAID. Take a stout stick of almost any kind

and place it so that each end will rest on the rim of one of the goblets.

Having completed your apparatus. take a stout broom handle and strike the suspended stick a violent blow inthe middle. Every one will be certain that both the goblets will be smashed to pieces. But they will remain intact. If dried they are found excellent for and the stick, stout though it may be, will be broken in the middle. The philosophy of this experiment is simple. The force of the blow breaks the suspended stick before it can oo communicated to the goblets.-Exchange.

Gerdening Game.

This is gardening made easy. Each of the players is asked in turns what was planted in his garden and what came up.

Articles planted may be of any description, but must come up plants of some kind whose names have some punning connection with the articles planted for example:

First Player-I planted a ball, and if came up a rubber plant.

Second Player-I planted the United States, and it came up a motor caruse tion (car sation).

Third Player-I planted a calendari and it came up dates. Fourth Player-I planted a ship, and

t came up a dock Fifth Player-I planted an old cost.

and it came, up firs (furs). Sixth Player-I planted a watch, and it came up 4 o'clock.

Lite a sensible girl she leaned on this ene. (She wasn't even surprised when he said that be was on his way up to Irvington and would take charge of har me for as Hastings. She might pay for both tickets out of her lost Purse, and the might have been most unhappy had she known that be had her diamond broach in view, but as it yas she fait nothing but giad relief. They ant together on the train. Miss Jacking told the professor all about Columbus, and be told her all about Celambia. He spoke seven different internance and was learning seven othprofessors were profound. absent-minded and tactiture, but she did not and this one so. He had given her an oddrone so that she might return the mener be had loaned her.

When Hastings was reached, bet gratitude became profosad. She insheed that he, stop over one train and allow her aunt to thank him. He stalled in a curious way, thought over it for a moment and then accepted the Invitation.

The sunt was no spring chicken, and the was passied over the professor. At first she set him down as a confidence man, but his knowledge of Columbia college and the seven languages upset this theory. His manners were good. and his conversation confirmed his assertions. He was finally accepted, repaid the loan and invited to call again. The police will never be able to satisfactorily explain to themselves why Jimmy the Kid, as his, photograph m the reguer gallery was labeled. ald have made a second and a third while to the house on the Hudson. It couldn't have bren from a spirit of bravedo, for Jimmy was sly. He couldn't have been "hit," for he was the one who had robbed the girl on the ferry boat and was still making use of ber money.

For his second call Jimmy had dressed up a bit. It beiped bim in one way and damaged bim in apother. He dida't look so much like a professor in his better sait, but it did help his looks as a caller. He was still interesting. toe, and an bour passed away. When be hed departed and the women had criticised him favorably, the sunt said

"Is this to be your last call bere?" "Positively the last, and I see no reason why you should give me away. Let It so as it is. I've been a gentlemas shantung pougee in sage color, with again for a few days, and I don't be trimming of black soutache braki ap lieve the women in there would thank plied over a simple design and worn you for showing me up." "Professor, I bid you godspeed on The blouse is closed invisibly at the your way to Samalong," replied Tom back as be raised his bat and extended his hand, and thus they parted.

At the house the two women were very curious and asked many ques tions, but 'I'om would not give them much information beyond saying that it was just as well that the professor was going away. An hour later. after she had had time to think things over Mrs. Harper jelt that she bad got pret ty near the truth, but she sighed as she said to Miss Irene:

"Poor professor! He was such as entertaining gentleman?"

Language of Umbrellas.

There is a language of ambrelias as of flowers. For instance, place your umbrella in a rack and it will often indicate that it will change owners. To open it quick'y in the street means that somebody's eye is going to be in danger.

To shut it quickly signifies that a bat or two will probably be knocked off. An umbrella carried over a woman, the man getting nothing but the drippings of the rain, signifies courtship. When a mon has the umbrella and the woman the drippings it indicates marriage.

To swing your umbrella over your shoulder signifies "1 am making a puisance of myself."

To put an alpace umbrella by the side of a silk one signifies "Exchange is no robbery."

To lend an umbrella indicates "I am a fool."

10 return an umbrella means-well. pever mind what it means. Nobody ever does that -- Spare Momenta-

Funny Robellions.

A rebellion in China, as a rule. is t comparatively barmiess sfair, says the Times of India. The people inform the governor that his exactions are in escens of custom and that he must reduce them. If he agrees the matter ends if not, there is a demonstration "Iwae wouldn't it be funny. wouldn't and perhaps sume shooting, but this is to a compromise, for the Peking government never backs up Its officials when force has to be resortseted the girl without blushing. hey are young. We never have any trouble with them when they are old enough to break I believe in giving goid care to colta as well as work horses. In my experience, a horse not properly cared for as a colt does also be housed in bad weather. I believe in giving plenty of good, whole-some food. Horses should have special attention, and the man who succeeds is the one who keeps a close eve on the individuals.-G. H. Ganson. Ohio:

Insect Discovered In the Maritime Provinces.

The brown-tail moth; a pest that has caused millions of dollars' damage to orchards, ornamental trees and forests in New England has made its appearance in Nova Scotia and specimens have recently been found in the fruit belt of the Annapolie Valley One found in Wordville, King's County, was sent to Ottawa, where in the department, laboratory it was identified as the brown-tail moth, Specimens have recently been found in Dirby County.

Agricultural authorities are doing all that they can to meet the emer rency and stamp out the pest ere # does any damage.

Cattle Tic's.

The eradication of cattle ticks in her lieved to be possible if all suggested precautions are taken. Cattle and premises may be freed from ticks by hand picking the cartle and destroring the ticks, after which the cattle may be thoroughly grensed Infested cattle should be examined every oth er day, attention being given to the inside and back portion of the thicked where the ticks are liable to be most numerous. For greasing the cattle crude oil is recommended or cutton. seed oil, fish oil or lard. Where a farmer owna but: a few head of cat. tle, the estile may be picketed on tick free pasture and oceasionally moved, taking care to avoid these in calities for nine months thereafter Department of Agriculture

Breed Heavy Drafters.

In breeding draft homes too much attention cannot be given to the anetion of weight. At all of the kading draft horse markets horseflesh sells at the rate of 25 cents per pound for each additional pound from 1.410 to 1.800 pounds, for 50 cents per wound from 1.800 to 2.000 pounds for \$1 pound from 2.000 to 2.500 pounds and from \$2 to \$2.50 per pound from \$ 204 pounds upward, provided of emme that the horse is sound. well mide and desirable in every other respect. Thus the heavy ones are the kind we should all sim to produce, because at hert we will get plenty of the lighter weights to meet the demands for the

Cere of the Meadew.

G. M. Clark, the banner hay emp grower, says: Never dig ditches to fill with meks in a grass field. Never, underdrain, your grass field, until you find it necessary.

LITTLE KITCHEN HELPS.

Orange marmalade makes a very tasty accompaniment for bolled ham. Add a teaspoonful of curry powder to the cream sauce in which macaroni is baked.

Stew a pound of pruses with pot roast and note the due faver impart. ed to the mest.

Good macaroni is of yellowish tint. does not break readily is cooking and swells to two or three times its bulk. Bananas should not be put into a refrigerator-in fact, they should never be allowed to get colder than 00 degrees, A chill turns bananas black. prevents, their ever ripealog property.

and renders them unfit for use. Stains on enameled ware can be removed thus; Fill the pan or, bowl with water and add to it a piece of potanh. Let this remain standing for a little while, then pour the water away and wash the vessel, when the stains will disappear.

Fashiens In the Clouds.

As ladies are among the most enthuslastic devotees of the new pursuit of ballooning it is interesting to learn that fashious obtain even soaring in the clouds. One is informed that lady balloonists' dresses should be made of gaberdine. slimber or ioden cloth: that the fashignable color is green and that the coat, which is lised with freece or silk. should be short, with two breast pockets, two cross peckets and two hand rests for keeping the hands warm? The skirt is adjustable that is, can he drawn up or let down by cords. A Lallonning cap, a slip-on waterproof. Canadian mitts and dark brown boots complete the outfit.

Darning Table Lines

To darn table damask, use & raveling from the cloth. If there is an actual hole, put under it a place of the same damask, matching the patterns to a thread. Then darn backward and forward with the raveling. If the work is done right, the patch will bot show after laundering, except by careful erutiny, in the past skill in such needlernft was considered a beces any arronnliabment for the "Inisbed young hely."

Veel Friesdellen. Chop finely some cold yeal and a lit tie cooked bam mix with it a few breadcrumba, a little lemon peel and respon with pepper, sait, mace and a small guantity of chopped pareley.

Beventh Player-I planted a pert young miss, and she came up a wallflower. Eighth Player-I planted some steps and they came up hops. Ninth Player-I planted an Irishman

and be came, up a potato.

A Jolly Momory Game.

At range ten or a dosen articles on a table and place a very clearly marked tounter Lenkie each one. Then call in. your company and give them just ondminute to the second for observing the articles and numbers.

Then they must return to the other room and try to write down the arthcies in the order they were arranged. numbering each properly.

At Brat it will be most difficult for most players to remember everything and every number, but with practice they will find they can depend on their memories more and more.

It is one of the very best games for the family to play. If father or mother complains of failing memory recommend it to them. It will really benefit them, just as some form of calisthenics will benefit their stiffening muscles.

Leaves of Desert Plants.

There is a very good reason for the lack of leaves in desert plants. The object is to check the transferation of moisture by offering as small a surface as possible to the dry air. For the same reason the roots of deseri plants usually run deep into the soil so that they can such up all the available moisture. In some instances the leaves assume a vertical position and thus avoid the direct rays of the burning desert sun. On the other hand, the leaves of trees in very wet countries are provided with points, such as the maple, from which the rain drips off. Were the leaves flatter the rain would collect and make them rot

If for no other reason, woman is needed on school boards because she recognizes the futility of regulation commencement frocks. Every now and then a set of school directors decrees that every high school girl graduate must wear a cap and gown at the graduating exercises of her class. Pethaps some of those men were fathers and were moved to this innovation by an alterior recard for the privy purse. but it's safe to say their preachments

CLEAR CONTRACTOR AND TEA TABLE TRIMMINGS. Little Delaties to Pique the Appetit

at Afterneen Affairs. Since the custom of taking afternoon. ten is not only well established in this country, but now in danger of becoming an untimely feast, it is astonishing to note the numerous little dainties and extra trimmings which are being served to plone and delight the appetite. It is no longer merely a cup of ten and a slice of thin bread and butter that may be expected between d and 5:30 o'clock. Jam has been added to the list and often hot Scotch scones and English mutting. Beside the tea table proper there stands usually a sort of rack table, pyramidal in shape and having three shelves, one above the other and round like plates. Each one is covered with attractive china holding some fascinating biscult or cake. Jam of one or two kinds is suggested in between them, and after the hostess has ascertained which jam and biscuit ber guest prefers she spreads it for him herself before passing it on a small plate. This little attention appears very gracious.

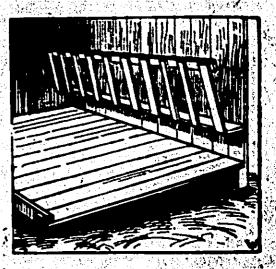

Among the biscuits those of "health food" reputation are often found and the jam is spread over them to add to their somewhat questionable tastiness. Other hostesses have fine, small, flat wafers of whole wheat covered with chocolate in their own kitchens before serving. They are then above reproach to pass with tea. The biscuit itself is digestible, the chocolate tasty and nourishing. Biscuits covered with cheese, on the contrary, while highly agreeable to the taste, are avoided by those hypercareful about their diet. Strawberry jam is undoubtedly the favorite for spreading on English muffing. Blackberry jam or guava is chosen to spread on the health food biscults, especially those made of graham or whole wheat. Scotch scopes are spread only through the middle with fresh butter. These scones are very similar to old fashioned soda biscuits and are invariably served bot. In size they are little larger than a quarter of a dollar. The number that some people can make disappear is therefore readily countenanced. Wafer toast fluds a place at afternoon

tea. In making it the bread is cut as thin as possible, and it is then toasted until extremely crisp. It is eaten dry or with iam, but it is never buttered. When cake appears at afternoon tes.

the fashion rages for a rich pound cake showing through it many large raisins. Europeans invariably refer to it as "American plum cake" and regard it as a specialty of this country. In entertaining foreigners, therefore, it is

Dairymen everywhere are awakening to the fact that cleanliness in the stahis means better milk and consequently better prices, and any arrangement that will belp keep the milk giver out of the dirt should be of interest. The illustration shows a stall that a writer in the Prairie Farmer claims will keep a cow perfectly clean. It is constructed as follows: Use a 2 by 4 for bottom of feed rack. Place this three feet from floor to stall. Use 1 by 4 stripe placed about six inches apart, forming the rack. The strips should slope back

STALL FOR KEEPING COWS CLEAR. about sixty degrees. Place a 2 by 4 on edge from seven to eight feet from front of stall on the floor, depending on size of cow. Fasten the 2 by 4 down to floor, if set in dirt, with a good sized stake. If floor is made of plank, nail a block to floor, then spike the 2 by 4 to blocks.

The cow when eating will stand with her hind feet just behind the 2 by 4. leaving the droppings behind it. When she lies down she will be compelled to lie in front of the 2 by 4, with her head under the feed rack. It is not necessary to have a gutter in a stall of this kind. There should be short partitions, however, to keep the cows from turning around.

Testing the Dairy Herd. Records of the performances of dairy cows form the only accurate and safe

basis for judging their value. It is the constant aim of progressive dairymen to improve their herds, and such improvement must depend largely upon culling the herd

and getting rid of the unprofithle enimele From the breeders' standpoint records are especially valuable. in assisting in finding customers for their stock. Many huyers insist on seeing records of dairs performance before purchasing. A record is also of great help to the feeder. If he knows exactly what a cow is doing he can prepare the ration accordingly and often feed SCALE FOR TESTING. more economic-

Undonhiedly there is justice in the criticism that the dressing at graduation has been carried to excess and that some of the class perhaps face the alternative of an uncomfortable feeling of shabbiness or an expense they can ill afford. But things have changed much for the better from the days when a commencement gown meant heavy silks and rich laces and chiffons. Now the filmy lingerie frock is the only one considered for such occasions, and it is surprising how cheaply a really charming gown may be made.

to scarcely make it worth while to de-

prive girlbood of one of its time bon-

ored privileges as fuffy, becoming

Of course it must be white. Who ever heard of girlhood making her first bow to the workaday world of grownupness in pink or blue. or lavender? Such white, lovely fabrics there are to choose from, too, for this all important commencement gown! As it does duty for a best dress all summer and for many an informal affair next winter, it is not such an extravagance after all. Mull, handkerchief linen, embroidered muslins, dotted batistes and swiss are the favorite materials, but equally fresh, dainty costumes can be evolved from plain india linen, dimity or Persian lawn. A very lovely soft sheer dress can be made of Paris muslin, which is wide and can be had in a really nice quality for 35 cents a yard. When it comes to trimmings, natural-

ly the cost of a gown may be extended indefinitely; but, after all, the prime, regulate of a commencement frock is freshness and girlishness, and this desirable result may quite as often be

perhaps the most acceptable cake to offer.

How One Girl Rests.

"The first thing I do when I get home from the office is to change all my clothing." said the business girl. "I know it takes time, but it pays. It not only saves wear on the office skirt and shoes, which amounts to a great deal, for there is no quicker way. to set a skirt shapeless and shabby than to lounge around in it at home. but I do it even more for the rest it

gives me. "If you have never made a practice of it, you cannot guess what a rest it: is to put on other shoes, to slip into another blouse and collar and skirt. "When I have bathed my face and done this. I feel like another person. Even if I don't get a chance to lie dewn before dinner I am refreshed. "And my office dress and shoes, all carefully brushed and ready for morning, are also the better for this extra relief."

Advise to New Homemakers.

Do not furnish your house fully until you have lived in it awhile. Buy at first only such furniture as you need for comfort. When you are settled, you can study the needs of each part of the house, and after you have fully determined what you want buy it when you see an advantageous chance.

Never decide hastily upon a piece of furniture. Purchase furniture for the future as much as for the present. It from year to year, but it is only peo- say the least, this kind of a cow is a ple of large means who can follow a fashion of this kind.

Plain: elegant styles are the sort that wear. best and give the best satisfaction in the end, even though they are a

ally. Again, a daily milk record enables a dairyman to detect the anproach of sickness in a cow and thus to take steps to ward it off. Great inspiration is obtained from keeping a record, and nothing gives a dairyman more satisfaction than watching the improved returns from his herd.

The scales shown in the illustration is the nicest thing made for testing purposes. It has two pointers. Before milking you hang the empty pail on the book and set the colored pointer at 0. Then when you come to weigh the milk you read the weight as marked by this hand. A spring belance that can be bought for 25 or 35 cents will answer the purpose, but will not be as convenient. A shelf on which the bottles are kept, a record sheet and a lead pencil complete the stable equipment for testing your herd. It is but a moment's work to hang the milk pail. on the scales, read the dial and record the weight. Mixing the milk and taking the sample will occupy a few moments more, says Kimball's Dairy Farmer, but all represent a very little time and a great deal of gain.

The "Boss" Cow in the Herd.

In every herd of cows there is some one of the number that takes the initistive. She is the first one to lead the rest through a fence into a cultivated field, If there is a gate in the yard which has been left partly latched she will be sure to find it and lead the berd is true fashion changes in furniture into the garden or down the road. To constant originator of trouble, and it seems to be her, pleasure to do anything but chew her cud and produce a good mess of milk in the dairy. Where a cow with an unruly nature is only an ordinary producer she will fill a much better place in the beef barret than in the dairy berd. This is a profitable and quick manner of getting rid of a constant source of aggravation

Probably the Most Growsome Musical Instrument Known.

It is a well known fact that through developed remarkable skill. The old stories of how these Indians made pottery and earthenware by the aid of only the most crude instruments and of their methods of burning and carving out the insides of the trunks of trees to make canoes are universally known.

But even with all their skill the fact race cannot be evaded, as is shown by this grewsome instrument. In the time of the early settlers of this hemisphere their acts of cruelty were without precedent in the history of the world.

jo" came to light. It is known that in. the small country of Paraguay, in the east central part of South America the Indians who inhabited that place were more than ordinarily cruel. The were constantly engaged in warfare, and their primary aim when thus engaged was to capture the chief of the opposing side. When captured, this personage was carried to their camp and there cruelly murdered, and it was from his body that this awe inspiring musical instrument was made.

The instrument is made as follows: The body is decapitated, and the skull is then thoroughly dried. The one who is to perform the feat of making the instrument then cuts the top entirely off. Over the opening thus made a piece of skin taken from the body and also thoroughly dried is tightly stretched in the manner of a drum. From the back of the skull the two femurs or the two bones of the leg which extend from the knee to the hip project. These these bones are joined together with one of the ribs, also taken from that body. Then from the forehead of the skull to the rib which connects the two femurs a number of strings are tightly stretched. These strings are likewise, made from the skin of the victim, har ing been thoroughly dried, stretched and rubbed with rosin. But this even is not the full extent are unexcelled. A Romantic Wedding

A curious love story comes from New York. The facts, is the big question asked by the briefly, are as follows -- A bache- New York World. The following for who celebrated his 101st are some of the prime answers: birthday in April is to cross the A great nation founded by Atlantic Ocean this month to Washington and dumbfounded by claim an English lass of 99. They Roosevelt. will return to America and be married on August 27th, the bride's 100th birthday, at the home of their childhood in Eastern Tennessee. The hero and heroine and Get There. of this extraordinary romance are John B. Bundren, living in the mountains near Tatesville, and

Miss Rose, McGuire, of Preston, Lancashire. They were sweethearts eighty years ago and wanted to marry, but the girl's parents, who were English, objected and took her back to England. Mr. Bundren went West hoping that a change of scene would help him to bear the disappointment. He was in California at the time of the discovery of gold, became rich, returned to Tennessee and bought his birth-place, the adjoining farm where his sweetheart lived, and other property Recently he decided to hold a reunion of his old friends, asking none
